

# CONSULTING & SYSTEM INTEGRATION

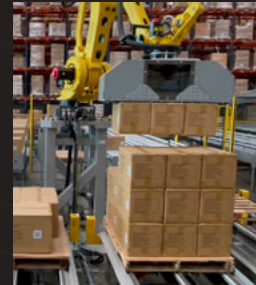

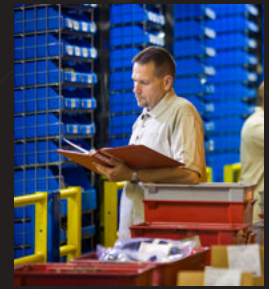

Enhance the efficiency, reliability, and productivity of your operations with the most complete intralogistics capabilities in the industry.

With more than 60 years of expertise, Associated provides a single-source solution covering the design, integration, and service of your equipment—everything from lift trucks and conveyors to automation and pallet handling systems.

While automating your current operation may be intimidating, Associated can simplify your adoption and implementation with an array of professional teams and tailored technologies.

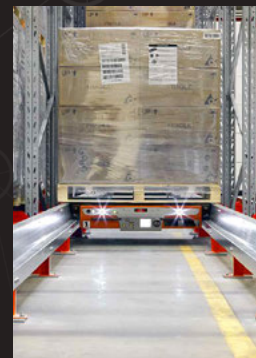

Our experienced application engineers and automation systems experts deliver integrated system solutions that meet your operational and ROI needs—efficiently and on time.
